Radiology at the University of Pennsylvania, 1890-1975

Abstract

Shortly after he became Chairman of the Department of Radiology in July, 1975, Stanley Baum expressed interest in a departmental history to Francis James Dallett, Archivist of the University of Pennsylvania. Mr. Dallett passed that information on to me, and I began my research in December of that year.

Dr. Baum's enthusiasm for the project and the willingness of current and former staff members to speak with me made the work possible. Eugene P. Pendergrass, M.D., was especially cooperative in answering my questions and passing along materials from his files. Their encouragement, plus that of Robert M. Stein, Associate Dean of the School of Medicine, then Department Administrator, permitted me to investigate the department's history at length.

I presented two lectures to the department's staff on my research: "The Department before World War I" on May 27, 1976, and "The Pendergrass Era" on September 22, 1976.

A first draft of the manuscript covering the period through Dr. Pendergrass's chairmanship was completed in the fall of 1976, but it has taken me until now to revise and complete the work. My full-time position as an Assistant Curator at Independence National Historical Park has kept me busy, and I would not have been able to complete the project yet, were it not for the professional support and understanding of my supervisor, John C. Milley, Chief, Division of Museum Operations.

Preface

Shortly after he became Chairman of the Department of Radiology in July, 1975, Stanley Baum expressed interest in a departmental history to Francis James Dallett, Archivist of the University of Pennsylvania. Mr. Dallett passed that information on to me, and I began my research in December of that year.

Dr. Baum's enthusiasm for the project and the willingness of current and former staff members to speak with me made the work possible. Eugene P. Pendergrass, M.D., was especially cooperative in answering my questions and passing along materials from his files. Their encouragement, plus that of Robert M. Stein, Associate Dean of the School of Medicine, then Department Administrator, permitted me to investigate the department's history at length.

I presented two lectures to the department's staff on my research: "The Department before World War I" on May 27, 1976, and "The Pendergrass Era" on September 22, 1976.

A first draft of the manuscript covering the period through Dr. Pendergrass's chairmanship was completed in the fall of 1976, but it has taken me until now to revise and complete the work. My full-time position as an Assistant Curator at Independence National Historical Park has kept me busy, and I would not have been able to complete the project yet, were it not for the professional support and understanding of my supervisor, John C. Milley, Chief, Division of Museum Operations.

My training as a social scientist provided the tools necessary to write the history of the department, but not the technical expertise which was needed periodically. I am grateful to John

PREFACE

Hale, Radiological Physicist, and others, who took the time to clarify technical matters for me.

With the assistance of all those listed in the following Acknowledgments, however, the responsibility for errors is mine alone.

Acknowledgments

One of the most enjoyable aspects of this project has been the opportunity to talk about the history of the department with both former and present staff members and consultants. Their assistance has proven invaluable in the compilation of information, and their personal insights and anecdotes add immeasurably to the text. My special thanks go to Robert P. Barden, M.D., Larissa T. Bilaniuk, M.D., Edward M. DeYoung, M.D., Adele K. Friedman, M.D., Philip J. Hodes, M.D., David E. Kuhl, M.D., Wallace T. Miller, M.D., Mark M. Mishkin, M.D., and S. Reid Warren, Sc.D.

Other members of the staff of the Department of Radiology have also generously aided me in this project. I am particularly appreciative for the assistance provided by George F. Brady, Betty Lou Ditz, Sandra A. Girifalco, Jessica M. Hullings, Margaret Joan McKee, Gary A. Pfaff, Carol J. Reynolds, and Charles D. White. Bette Schweiker, of the hospital's Administration Department, was exceedingly helpful and patient as I photocopied the entire set of *Annual Reports of the Board of Managers*.

Many individuals at research institutions throughout Philadelphia kindly assisted me with my work. I wish especially to thank Roy E. Goodman, Reference Librarian at The American Philosophical Society, Ellen G. Gartrell, Elizabeth M. Moyer and the reference librarians at The College of Physicians of Philadelphia, Stephanie A. Morris, and Francis James Dallett, and the entire staff of the University of Pennsylvania Archives and Records Center.

My most heartfelt thanks go to John Hale, Ph.D., Radiological Physicist in the department, and Eugene Percival Pendergrass,

ACKNOWLEDGMENTS

M.D., Emeritus Professor and Chief. Dr. Hale edited the first draft of the manuscript for technical errors and style, and his input was extremely valuable. Dr. Pendergrass spent many, many hours telling me about the sixty years he spent in the department, and was always willing to answer my questions.

Very special thanks also go to my friend and associate, Marilyn Kralik, and to my special friend, Daniel J. Sharp, who spent countless hours editing and proofreading the manuscript.

Without the help of these and countless other individuals, this history could not have been written. Again, thank you!
