RECENT PUBLICATIONS

GRANTS

William Beltran, DVM, PhD, assistant professor of ophthalmology, has received a five-year, $7.9 million grant from the National Institutes of Health to study “Translational Gene Therapy for Rhodopsin Autosomal Dominant Retinitis Pigmentosa.”

Nicola Mason, PhD, assistant professor of medicine and pathobiology, has received a two-year, $440,000 grant from the National Institutes of Health to study “Identification of a Naturally Occurring Model for EBV-associated Lymphomagenesis.”

Charles Vite, DVM, PhD, assistant professor of neurology and neurosurgery, has received a $310,086 grant from the Mayo Clinic Rochester to study “Neurophysiologically Based Responsive Pharmacotherapy for Epilepsy.”

Penn Vet’s Veterinary Clinical Investigations Center is currently recruiting dogs and cats for a number of clinical studies.

If you have a dog or a cat that may be eligible, or if you are a primary care veterinarian with a patient suffering from any of the above, please call 215-573-0302 or email VCIC@vet.upenn.edu for more information.

To see what other ongoing studies are available, please visit www.PennVCIC.org.
