

Distinguishing a “Publisher PDF” and a “Postprint”

PUBLISHER PDF.

A PDF of the exact page image of the document as published, usually taken from the publisher’s website or an electronic journal database such as JSTOR.

POSTPRINT

The final, post-peer-review version of a document as accepted for publication. A postprint version is typically submitted to the repository by the author as a file in a word-processing format such as MS-Word. The content of the postprint is the same as the published version, but the postprint does not include the layout and formatting of the final version.

Top of Page

Note that the author has inserted a header that identifies the journal name, volume number, date, and the pagination of the published version (this was a word file converted to pdf).
