2018 Global Go To Think Tank Index Report¹

Abstract

Background on the Think Tanks and Civil Societies Program

The Think Tanks and Civil Societies Program (TTCSP) of the Lauder Institute at the University of Pennsylvania conducts research on the role policy institutes play in governments and civil societies around the world. Often referred to as the “think tanks’ think tank,” TTCSP examines the evolving role and character of public policy research organizations. Over the last 27 years, the TTCSP has developed and led a series of global initiatives that have helped bridge the gap between knowledge and policy in critical policy areas such as international peace and security, globalization and governance, international economics, environmental issues, information and society, poverty alleviation, and healthcare and global health. These international collaborative efforts are designed to establish regional and international networks of policy institutes and communities that improve policy making while strengthening democratic institutions and civil societies around the world.

The TTCSP works with leading scholars and practitioners from think tanks and universities in a variety of collaborative efforts and programs, and produces the annual Global Go To think Tank Index that ranks the world’s leading think tanks in a variety of categories. This is achieved with the help of a panel of over 1,796 peer institutions and experts from the print and electronic media, academia, public and private donor institutions, and governments around the world. We have strong relationships with leading think tanks around the world, and our annual think Tank Index is used by academics, journalists, donors and the public to locate and connect with the leading centers of public policy research around the world. Our goal is to increase the profile and performance of think tanks and raise the public awareness of the important role think tanks play in governments and civil societies around the globe.

Since its inception in 1989, the TTCSP has focused on collecting data and conducting research on think tank trends and the role think tanks play as civil society actors in the policymaking process. In 2006, the TTCSP developed and launched a pilot project named the global index of think tanks, designed to identify and recognize centers of excellence in all the major areas of public policy research and in every region of the world. To date, TTCSP has provided technical assistance and capacity building programs in 85 countries. We are now working to create regional and global networks of think tanks in an effort to facilitate collaboration and the production of a modest yet achievable set of global public goods. Our goal is to create lasting institutional and state-level partnerships by engaging and mobilizing think tanks that have demonstrated their ability to produce high quality policy research and shape popular and elite opinion and actions for public good.

ACKNOWLEDGEMENTS

The 2018 edition of the Global Go To Think Tank Index Report marks the 13th edition of the report. I want to thank all the interns, peers and experts who have helped make the report a valuable resource for policy makers, policy-oriented civil society organizations and the public. The Go To Index is now used to identify and recognize centers of excellence in policy research, forge knowledge and policy partnerships and create a global think tank village. I want to express my deep appreciation to the 3750 plus university faculty and administrators, journalists, policy makers, think tank scholars and executives, and donors from every region of the world that participated in the 2018 Global Go To Think Tank Index (GGTTI). I would like to thank the functional area and regional specialists who served as expert panelists and provided valuable insights and assistance as I compiled the report. Thank you also to my research interns for their help in compiling and analyzing the data for the 2018 Index. They, in conjunction with the regional research intern team, put in long hours to help improve the quality and appearance of the Index. A special thanks to the director and staff of the Lauder Institute for their help and support. Finally, I want to thank the more than 300 host, planning committee members and partner institutions around the world that have agreed to host think tank events in approximately 75 countries and 125 cities. Once again, thank you for helping the TTCSP highlight the important role think tanks play in civil societies and governments around the world. Last but not least, thank you to Mauro F. Guillén, Director of the Joseph H. Lauder Institute, for his support and to the dedicated group of TTCSP research interns who help make the Global Go To Think Tank Index possible.

Introduction

The 2018 Global Go To Think Tank Index (GGTTI) marks the thirteenth year of continued efforts by the Think Tanks and Civil Societies Program (TTCSP) at the University of Pennsylvania to acknowledge the important contributions and emerging global trends of think tanks worldwide. Our initial effort to generate a ranking of the world's leading think tanks in 2006 was a response to a series of requests from donors, government officials, journalists, and scholars to produce regional and international rankings of the world's preeminent think tanks. Since its inception, our ongoing objective for the GGTTI report is to gain understanding of the role think tanks play in governments and civil societies. Using this knowledge, we hope to assist in improving the capacity and performance of think tanks around the world.

Since 2006, the ranking process has been refined and streamlined, and the number and scope of the institutions and individuals involved has steadily grown. The process, as in past years, relies on a shared definition of public policy research, analysis, and engagement organizations, a detailed set of selection criteria, and an increasingly open and transparent nominations and selection process. As part of the nominations process, all 8,248 think tanks catalogued in the TTCSP's Global Think Tank Database were contacted and encouraged to participate in the nomination and ranking process. In addition to over 68,191 journalists, policy makers, public and private donors, and functional and regional area specialists on the TTCSP listserv were invited to participate and over 3750 fully or partially completed the nomination and ranking surveys. Finally, a group of peers and experts was asked to help rank and review the list of public policy research centers of distinction for 2018.

To refine and validate the generated ranking lists, TTCSP assembled Expert Panels comprised of hundreds of members from a wide variety of backgrounds and disciplines. Additionally, new media – the website and social media presence – helped us communicate and disseminate information about criteria for this year's Index to a wider audience (please see "Methodology and Timeline" for the complete set of nomination and ranking criteria, and "Appendices" for a detailed explication of the ranking process). Given the rigor and scope of the nomination and selection processes, the rankings produced thus far have been described as the insider's guide to the global marketplace of ideas.

As a final note, we would like to remind you that the data collection, research, and analysis for this project, as in previous years, were conducted without the benefit of field research, a budget, or staff.

Despite these limitations we are confident of the quality and integrity of the findings given the number of peers and experts from around the world who have taken the time to participate in the process.

We are confident that the peer nomination and selection process, as well as the work of the international Expert Panels, have enabled us to create the most authoritative list of high performance think tanks in the world. Still, efforts to streamline and perfect the process are ongoing. We are continually seeking ways to enhance the process and welcome your comments and suggestions. We further encourage you to provide the names and contact information for prospective expert panelists for functional and regional areas covered by the Index.

Thank you for your continued support of the TTCSP and of the annual Global Go To Think Tank Index. We hope our efforts to highlight the important contributions and emerging global trends of think tanks worldwide will foster insightful discussions and debates on the present and future roles of these vital institutions.

What is a Think Tank?

Think tanks are public-policy research analysis and engagement organizations that generate policy-oriented research, analysis, and advice on domestic and international issues, thereby enabling policy makers and the public to make informed decisions about public policy. Think tanks may be affiliated or independent institutions that are structured as permanent bodies, not ad hoc commissions. These institutions often act as a bridge between the academic and policymaking communities and between states and civil society, serving in the public interest as independent voices that translate applied and basic research into a language that is understandable, reliable, and accessible for policy makers and the public (Think Tanks and Policy Advice in the US, Routledge 2007 and in *The Fifth Estate: Think Tanks, Public Policy, and Governance*, Brookings Institution Press 2016)

In an effort to bridge these conceptual problems and create a typology that takes into consideration the comparative differences in political systems and civil societies, we have developed a number of categories for think tanks. Think tanks may perform many roles in their host societies – there is, in fact, wide variation among think tanks in the work they do and the extent to which they do it. Over the last 89 years, several distinct organizational forms of think tanks have emerged that differentiate themselves in terms of their operating styles, patterns of recruitment, and aspirations to academic standards of objectivity and completeness in research. It should be noted that alternate typologies of think tanks have been offered by other analysts.¹ In the global context, most think tanks tend to fall into the broad categories outlined below.

Figure 1: Categories of Think Tank Affiliations

CATEGORY	DEFINITION
AUTONOMOUS AND INDEPENDENT	Significant independence from any one interest group or donor and autonomous in its operation and funding from government.
QUASI INDEPENDENT	Autonomous from government but controlled by an interest group, donor, or contracting agency that provides a majority of the funding and has significant influence over operations of the think tank.
GOVERNMENT AFFILIATED	A part of the formal structure of government.
QUASI GOVERNMENTAL	Funded exclusively by government grants and contracts but not a part of the formal structure of government.
UNIVERSITY AFFILIATED ²	A policy research center at a university.
POLITICAL PARTY AFFILIATED	Formally affiliated with a political party.
CORPORATE (FOR PROFIT)	A for-profit public policy research organization, affiliated with a corporation or merely operating on a for-profit basis

²Another typology distinguishes between three types of think tanks: “universities without students,” contract researchers and advocacy tanks. Weaver (1989).

North America and Europe

- There are 2058 think tanks in North America (Mexico, Canada and US) of which 1872 are in the United States. There are 2219 think tanks in Europe.
- Over 51 percent of all think tanks are in North America and Europe, a decrease from last year.
- The number of think tanks in the US has more than doubled since 1980
- The End of Post WWII consensus & Challenge to the Welfare State contributed to the growth of think tanks on the left and the right of the political spectrum
- Most of the think tanks that have come into existence in the United States since the 1970s are specialized for a particular regional or functional area
- About one quarter of U.S. think tanks are located in Washington, DC
- The rate of establishment of think tanks has declined over the last 12 years in the United States and Europe.

Asia, Latin America, Africa, and the Middle East

- Asia, Latin America, Africa, the Middle East, and North Africa continue to see an expansion in the number and type of think tanks established
- Asia has experienced a dramatic growth in think tanks since the mid-2000's
- Many think tanks in these regions continue to be dependent on government funding along with gifts, grants, and contracts from international public and private donors
- University, government affiliated, or funded think tanks remain the dominate model for think tanks in these regions
- There is increasing diversity among think tanks in these regions with independent, political party affiliated, and corporate/business sector think tanks that are being created with greater frequency
- In an effort to diversify their funding base, think tanks have targeted businesses and wealthy individuals to support their core operations and programs.

Reasons for the Growth of Think Tanks in the Twentieth and Twenty-First Centuries

- Information and technological revolution
- End of national governments' monopoly on information

- Increasing complexity and technical nature of policy problems
- Increasing size of government
- Crisis of confidence in governments and elected officials
- Globalization and the growth of state and non-state actors
- Need for timely and concise information and analysis that is “in the right form, in the right hands, at the right time”³

Reasons for the Recent Decline in Number of Think Tanks Established Worldwide

- Political and regulatory environment growing hostile to think tanks and NGOs in many countries
- Decreasing funding for policy research by public and private donors
- Public and private donors tendency toward short-term, project-specific funding instead of investing in ideas and institutions
- Underdeveloped institutional capacity and the inability to adapt to change
- Increased competition from advocacy organizations, for-profit consulting firms, law firms, and 24/7 electronic media
- Institutions having served their purpose and discontinued their operations.

When I helped organize the first international meeting of think tanks, one of the major debates at the meeting was the contention that the term “think tank” doesn’t travel well across borders and cultures. That is clearly no longer the case, as the term is now widely accepted around the globe to describe “public-policy research analysis and engagement organizations that generate policy- oriented research, analysis, and advice on domestic and international issues, which enable policy makers and the public to make informed decisions about public policy issues.”⁴

And increasingly, think tanks are a global phenomenon because they play a critical role for governments and civil societies around the world by acting as bridges between knowledge (academia) and power (politicians and policy makers).

Governments and individual policy makers, throughout the developed and developing world, face the common problem of bringing expert knowledge to bear in government decision-making. policy makers need understandable, reliable, accessible, and useful information about the societies they govern. They also need to know how current policies are working, as well as to set out possible alternatives and their likely costs and consequences. This expanding need has fostered the growth of independent public policy research organization: the think tank community, as we know it.

³ McGann, James G., ed. Think tanks and policy advice in the US: Academics, advisors and advocates. Routledge, 2007.

⁴ McGann, 2007

Think tanks have increased in number, but also the scope and impact of their work have expanded dramatically as well. Still, the potential of think tanks to support and sustain democratic governments and civil societies around the world is far from exhausted. The challenge for the new millennium is to harness the vast reservoir of knowledge, information, and associational energy that exist in public policy research organizations so that it supports self-sustaining economic, social, and political progress in every region of the world for public good.

Part of the goal of this report is to raise some of the critical threats and opportunities that face the think tank community globally. These threats are best expressed by what I call the “four mores”⁵:

- More Issues
- More Actors
- More Competition
- More Conflict

These threats create a set of challenges that confront all think tanks:

- Competitive challenges
- Resource challenges
- Technological challenges

To effectively respond to the threats and opportunities posed by this new and challenging environment, think tanks need to focus on the “four M’s”:

- Mission
- Market
- Manpower
- Money

In a global marketplace of ideas, think tanks need to develop national, regional, and global partnerships while creating new and innovative platforms to deliver their products and services to an ever-expanding audience of citizens, policy makers, and businesses around the world.

⁵McGann, 2007

2018 Trends and Transitions in Think Tanks and Policy Advice

The Think Tanks and Civil Societies Program is dedicated to understanding the key trends and challenges facing think tanks around the world. All of our research, publications and regional and global think tank summits are focused on the organizational challenges confronting the think tank community and the policy challenges facing think tanks, policymakers and the public. This issue we have decided to highlight the potential impact and importance of think tanks in a time of increased challenges, change and consequences, as well as potential new business models for think tanks.

Think Tanks: A Bridge over Troubled Waters and Turbulent Times

The world is witnessing a rise in populism, nationalism and protectionism, signaling a challenge to the post-WWII order and multi-lateralism. At the same time, transnational challenges such as growing trade tensions, economic turbulence, increasing economic inequality, climate change, mass migration and refugee crises, as well as traditional and non-traditional security threats, demand that countries and institutions cooperate more regularly and effectively. We are facing a significant period of change where established international organizations that have helped sustain relative peace and prosperity are under assault. This all taking place while enduring and emerging existential, transnational threats are growing. The post WWII economic, political and security order are being challenged and redefined by national and regional tectonic shifts in domestic and international politics. We are living through an extraordinary historical moment in world history and it is important to take stock of the technological, political, economic and organization trends and disruptions that are taking place in real time. It provides us with an opportunity to assess cross cutting issues and trends. These are daunting challenges, and so it essential that we marshal our intellectual and institutional resources in order to assess cross cutting issues and trends.

There are four key trends that flow from the 4th industrial revolution that will transform all of our jobs and lives over the next 10 years. It is these forces that are driving the digital and political disruptions that sweeping across the globe:

- The disruptive power of social media, artificial intelligence and big data;
- The dramatic increase in the rate of technological change;
- Global information interdependence and
- The increased velocity of information and policy flows.

The internet, human and digital networks that are constantly being enhanced by new technologies are increasing both the volume and velocity of information flows around the world. These new realities are making possible to manage and manipulate massive amounts of data which is disrupting business, politics and public policy. Henry Kissinger famously said that being a policy maker is like being at the end of a firehose, today we are all at the end of a fire hose.

These trends in information and technology have served as an accelerant that is fueling the political discontent and disruptions that are on the rise in US, France, Britain, Italy, Philippines, Hungary, Brazil and other countries around the world. Some have erroneously attributed the source of this discontent to be a backlash against globalization. The reality is the much more complex and Involves a number of issues and problems that thanks to the internet, social media and social networks have become omnipresent and inescapable. The uncertainty of our times

has created a sea of insecurity that has made people concerned and confused about their future of their work and wellbeing. This sea of insecurity is comprised of 7 factors that have intensified over the last 5-7 years. The failure of government or elected officials to address these issues because of political polarization and policy paralysis has left many citizens disillusioned and discontent. These factors help explain why people are gravitating to nontraditional politicians who promise security and quick fixes to complex problems. The sea of insecurity is comprised of the following factors:

1. **Economic Insecurity** job, entire careers and professions are reengineered or simply vanishing, the income gap is growing and the opportunities for the current generation may not be as promising or secure as it was for us or our parents.
2. **Physical Insecurity** we are reminded on a daily, hourly basis of terrorist attacks, the impact of climate change and other catastrophic events, such as the prospects a nuclear conflict, all of which increase our sense of insecurity.
3. **Loss of National and Personal Identity** changing demographic patterns and regular and irregular migration are raising questions about national identity. In 20 years, Asians, Hispanics and those of European decent will be of equal numbers in America. Similar changes are taking place in Europe. This change is disconcerting and is compounded by other economic and social factors.
4. **The New World Disorder** The balance of power that was characteristic of the Cold War provided a degree of order and security that is missing today and history tells that the most unstable and dangerous periods are ones where there are multiple power poles and powers are raising and falling. We are in just such a period where everyone is in charge and no one is.
5. **Information Insecurity** The Information Age has given us unprecedented access and convenience but this comes at the cost of privacy, security, loss of identity, and, to a certain extent, humanity. The flood of information, which includes disinformation, misinformation and attempts to manipulate us, makes us feel uncertain and insecure.
6. **Sea Change Insecurity** The world is undergoing a revolutionary change in science, technology and society. In addition, the rise of Asia as a economic and military power and the subsequent change in economic, social and political status that will bring is unsettling.
7. **No Answers** The most unsettling aspect of all of this is that our leaders and institutions are not focused on these issues. They are not addressing these concerns and that is why there has been a loss of trust and confidence in governments and elected officials.

This is where think tanks can play an critical role by helping create the answers and action that is needed in many countries today.

Think tanks play a critical role in analyzing, developing and promoting policy solutions, particularly in times of extreme disruption and change. However, these organizations now operate in information-rich societies where facts, evidence and credible research are often ignored — and where disinformation can gain a footing.

To remain relevant and impactful, think tanks and policy institutes must simultaneously pursue rigor, innovation, accessibility and accountability more than ever before. In short, think tanks must adapt and innovate by transforming their organization to be smarter, better, faster and more mobile.

Think tanks can provide a range of strategies and best practices for transforming public policy and institutions in an era of digital and political disruptions, as well as increased social and economic turbulence. While these are challenging times, it is also time of opportunity for those institutions that can develop new and innovative solutions to the complex problems we face.

New Business Models for Think Tanks

Think tanks today are facing increasingly intense changes in the world, both political and technological ones, which pose serious challenges and even existential crises to think tanks. In 2015, the columnist of the Washington Post, Amanda Bennett, asked “Are Think Tanks Obsolete?”⁶ Think tanks are not obsolete, but some of their strategies are. In order to overcome the numerous predicaments imposed by our times, think tanks need to innovate their business models.

A New Operational Context

Think tanks today face the “NGO pushback” in which external forces are using legal and extralegal means to limit the number, role, and influence of the civil society. This “pushback,” coined in the 2015 Global Go To Think Tank Report, resulted in part from the rise of partisan politics and political polarization, both of which eroded effective decision making and blurred the lines between policy advice and advocacy for think tanks.⁷ Influenced by this partisanship and the rise of populism, the general public has expressed a distrust of higher power institutions, including research institutes such as think tanks.

The funding landscape for think tanks has also changed drastically. The so-called “golden age” of think tanks in the 70s and the 80s is gone. Today, with the recent rise of global philanthropy, donors focus more on projects that are short-term, specific, and high impact.⁸ Furthermore, in the face of rapid technological advancements, think tanks now find themselves no longer the only actor in the knowledge brokerage industry, but as only one of the competitors in the “global marketplace of ideas,” vying with other actors such as media organizations, advocacy groups, consulting and law firms⁹.

Given this aforementioned context, adapting new business models seems inevitable and worth studying for think tanks. The traditional academic-centric model has ended. The business models for think tanks is changing from “the manner by which the think tank delivers value to stakeholders, entices funders to pay for value, and converts those payments to research with the potential to influence policy”¹⁰ to a condign that incorporates innovative strategies in management, communication, financing, and technologies without undermining the quality and rigorousness of research and publication.

Management

The leadership of think tanks is being called to change. The desire for a scholarly head of a think tank, where the motto held, “research it, write it, and they will find it”¹¹ no longer holds true. Today, think tanks not only need scholars, but also managers. In an information research world, where the competition for ideas and influence is intense, think tanks need to demonstrate the value they add to public discourse and public policy. The competition that think tanks have today leads some funders to conclude that the products and services of think tanks that have the “high impact” they desire are the ones which they are willing to fund.

In today’s environment, everyone can be a think tank, at least virtually. Think tanks face competition from advocacy organizations, for-profit consulting groups, and law firms, in addition to every means of electronic competition - an increasingly efficient competitor.¹² As noted in the 2015 Global Index Report, “Big data, which involves the collection and analysis of massive amounts of information to pinpoint critical data and trends, may render think tanks and their staffs superfluous. This new analytic capability enabled by supercomputers, maybe the think tanks of the future.”¹³ However, big data, and any of the competitors, cannot replace the potential insight that an organization devoted solely to policy research, has. Think tanks need to figure out how to market their product most effectively.

These think tank executives hold vast influence over the direction their institution takes. In the wake of all the global shifts that are directly impacting think tanks, executives need to wield their influence with these challenges in mind.

Strategic Communication

There are at least three audiences with which think tanks need to communicate - donors, policy makers and the general public. In order to catch the attention of these key audiences, a think tank needs to be able to deliver the analytical information it promises in a timely and effective manner.

In an age of nearly instant information dissemination via social media, think tanks have to keep this pace. Active blogging, social media use, online interactive forums, and infographics are examples of ways to do this. Once a think tank has garnered this kind of attention, they also raise their donor profile. When funding becomes an issue, the burden falls heavily upon the public image of the institution; this strategic communication of the goods and services a think tank can offer is an important way of maintaining necessary funding. These communication strategies are the vehicles in delivering research results, and thus are crucial in generating an impact on the policymaking community.¹⁴

¹⁴ Fred Kuntz. “Communications and Impact Metrics for Think Tanks.” *Centre for International Governance Innovation*. <http://www.cigionline.org/articles/communications-and-impact-metrics-think-tanks> (July 11, 2013)

Innovative Funding Strategies

While Benjamin Franklin has written that “In this world nothing can be said to be certain, except death and taxes,” think tank leaders today may say “In this world nothing can be said to be certain, except death and short-term project funding” -- if any funding is to be certain at all.¹⁵

Increasingly, think tanks are moving towards endowment-based funding to increase long-term stability. Others have suggested the establishment of funds such as a shared reserves fund and an emergency bridging fund to help think tanks to build capacity and avoid financial risks. In short, an effective and successful fundraising strategy should build the organizational strategy and related processes into researchers' everyday work; have a Monitoring and Learning (M&L) system in place that communicates real impact while generating useful information; and be explicit about the connection between the strategy and funding needs.

Big Data Analytics

Accompanying technological advancements is the increasing amount of data and the use of big data analytics. Some estimations suggest a 4,300% increase in annual data generation by 2020 - 44 times greater in 2020 than it was in 2009.¹⁶ According to studies conducted by the European Parliament Research Service in 2016, big data analytics could identify efficiencies that can be made in a wide range of sectors, leading to innovative new products, greater competitiveness, and economic growth.¹⁷ The McKinsey Global Institute stressed that “there are no industries in which the ability to continuously integrate new sources of data of any format and quality would not generate improvements.”¹⁸ Think tanks are no exception.

While there are certainly complex regulatory concerns and technical loopholes with the appearance of new technologies, big data analytics could help think tanks better measure their influence in a quantitative way. In 2016, Tsinghua University in China released the 2016 Big Data Report on Chinese Think Tanks, measuring the influence of Chinese think tanks by assembling 110 thousand websites, 18 million active Wechat -- a Chinese social media app -- official accounts, 150 million active Weibo (or the so-called “Chinese facebook”) accounts, 6,155 Online-forums, and 930 thousand News Apps for smartphones.¹⁹ This effort suggests that the seemingly unmeasurable “influence” of think tanks could be measured into numbers of citations, articles, and mentions on various platforms -- a technique that, while limited, could be adopted and used

to gain more insights regarding the communication strategies and level of social and political impact of think tanks.

Conclusion

In order to survive ever-escalating changes, more and more think tanks are recognizing the need for constant innovation. While taking the changing context into account, think tanks today should push to innovate in management tactics, strategic communication plans, fundraising strategies, and big data analysis.

On the other hand, the new business model should not go against think tanks' original mission to produce quality and influential research that could help policy-making. Think tanks need to find a delicate balance between innovating their business models and committing to the quality and rigorosity of their research and products. None should come at the expense of the other. It is only with an innovative business models and an unwavering commitment to the excellence of research could think tanks survive and excel in today's world.

Overview of Modifications and Enhancements to the Global Go To Think Tanks Index

Each year we attempt to respond systematically to comments and suggestions to improve the nomination and ranking process for the Global Go To Think Tank Index (GGTTI). Since the inaugural report in 2006, the nomination and selection processes have changed significantly. While the Think Tanks and Civil Societies Program (TTCSP) continually seeks to improve the nomination and selection process, several things should be kept in mind. First, although we do our best to catch and eliminate as many mistakes as possible, we do not claim that the annual rankings are error-free. As with many ranking systems, the GGTTI has its fair share of limitations, which we continually seek to overcome. Second, critiques highlighting the rankings' comprehensiveness fail to understand our commitment to studying the contributions and impact of think tanks worldwide. The Index's aim is to produce an inclusive and far-reaching report of international think tanks. Moreover, we hope to extend the Index to include even more think tanks around the world.

Recent Years' Modifications

TTCSP is committed to increasing the quality and representativeness of the Index every year we conduct the survey. Since 2010, hundreds of expert panelists have participated in an evaluation of the ranking criteria and nominations and indexing processes. As a result, the Index has undergone a number of major changes designed to limit bias, expand the rankings' representativeness, and improve the overall quality and integrity of the nomination process. The following modifications have been made to the Index over the last several years:

2010

- In 2010, a ranking list for think tanks with an annual budget of less than five million U.S. dollars was created. This category helps to recognize the work of smaller think tanks that produce influential research, but might otherwise be edged out in the rankings by think tanks with larger budgets and greater manpower.
- American think tanks were removed from the global ranking in an effort to improve the visibility of global organizations, and recognize the inherent advantages of American think tanks.
- The methodology was revamped to encompass an open nominations process in which all 6,480 think tanks identified by the TTCSP at that time were invited to submit nominations. This replaced a system where the Expert Panels developed the initial slate of institutions. The change dramatically increased the levels of participation and greatly improved the quality and representativeness of nominated institutions.
- An outreach effort was launched in Africa, Asia, Latin America, and the Middle East and

North Africa (MENA) to improve the Index's inclusivity.

2011

- The Latin America category was restructured into two categories: "Top Think Tanks in Mexico, Canada, and the Caribbean" and "Top Think Tanks in Central and South America."

2012

- The Latin America categories were further refined into: "Top Think Tanks in Mexico and Canada" and "Top Think Tanks in Central and South America."
- The Asia category underwent revisions in order to prevent the group's domination by China, India, Japan, and the Republic of Korea. The Asia section was divided into two categories: "Top Think Tanks in China, India, Japan, and the Republic of Korea" and "Top Think Tanks in Asia (excluding China, India, Japan, and the Republic of Korea)."
- Five new special achievement categories were created: "Best Advocacy Campaign," "Best Policy Produced by a Think Tank 2011-2012," "Best For-Profit Think Tanks," "Top Energy and Resource Policy Think Tank," and "Top Education Policy Think Tanks." These categories recognize both special achievements and excellence in particular areas of study. This expansion aimed to better recognize the diverse range of issues think tanks address and the new organizational types that have emerged over the past five years.
- The "Best New Think Tanks" category examined organizations founded over the past 24 months instead of the past 18.

2013

- To increase inclusivity, the Asia categories were further subdivided into three categories: "Top Think Tanks in Asia and the Pacific (Excluding China, India, Japan, and the Republic of Korea)," "Top Think Tanks in China, India, Japan, and the Republic of Korea," and "Top Think Tanks in Central Asia."
- The "Top Security and International Affairs Think Tanks" category was divided into "Top Defense and National Security Think Tanks" and "Top Foreign Policy and International Affairs Think Tanks."
- Eight new special achievement categories were added: "Think Tank to Watch," "Best Use of Social Networks," "Best Institutional Collaboration Involving Two or More Think Tanks," "Best Think Tank Network," "Best Think Tank Conference," "Best Managed Think Tank," "Best New Idea or Paradigm Developed by a Think Tank," and "Best Transdisciplinary Research Program at a Think Tank."

2014

- In order to amend anomalies that are present in the 2013 Global Go To Index, some of the regional categories were reorganized according to countries geographic location. The Central Asia category underwent revisions and will consist only of think tanks from Afghanistan, Armenia, Azerbaijan, Georgia, Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, and Uzbekistan. Turkish think tanks will remain in the Middle East and North Africa category, as will Cypriot ones – despite Cyprus’ status as an EU member state. Think tanks from Bangladesh, Bhutan, Nepal, and Pakistan will be ranked in the Asia and the Pacific category. The Central and Eastern Europe category will include Russian think tanks and also think tanks from those countries that lie between Turkey and Russia in the east and Sweden, Germany, Austria, and Italy in the west.
- The “Top Health Policy Think Tanks” category was subdivided into the “Top Global Health Policy Think Tanks” and “Top Domestic Health Policy Think Tanks” categories so as to better reflect the fact that there are two distinct areas of focus in the field of health policy.

2015

- Three new categories were added to the 2015 Global Go To Index: “Best Regional Studies Policy Research Think Tank (University Affiliated)”, “Best Regional Studies Policy Research Center (Free Standing, Not University Affiliated)”, “Think Tank with the Best Practices (Policies and Procedures) to Assure the Quality, Independence and Integrity of its Policy Research”

2016

- In an effort to simplify and streamline the nominations and rankings process we did not require those institutions that were not ranked in the 2015 Global Go To Index to be renominated in 2016 nominations phase of the Global Go To Indexing process.

2017

- Two new categories were added to the 2017 Global Go To Think Tank Index: “Water Security and Food Security”.

2018

- An audit has been conducted on the think tank database that involved comparative analysis of the data, fact and cross checking the data. Updated numbers are presented in the 2018 Go To Index Report.
- A section was added to each section of the survey that allowed respondents to report gross omissions or errors from previous years that required corrections or editing. Over 650 comments and suggestions were submitted and we have done our best to correct them.

2018 Process and Methodology

Each year, our best efforts have gone into generating a rigorous, inclusive, and objective process. However, we recognize the impossibility of entirely ridding the Index from bias. Inevitably, personal, ideological, disciplinary, and regional biases of those consulted throughout the process may have influenced the rankings. While some have suggested that we move to a small group or panel of experts and journalists to make the selections, we are unwavering in our commitment to an open and democratic process. Given the safeguards in place— the transparent process, the provisions set by the detailed nomination and selection criteria, and the annually increasing participation of think tanks and experts from every region of the world— we are confident in the quality and integrity of the Index. Additionally, with the growing involvement of the expert panelists, the nomination and ranking process has also been dramatically improved. Together, we believe these measures insulate the nomination and selection process from any significant charges of bias and misrepresentation.

We would like to underscore that the GGTTI is but one measure of a think tank's performance and impact, and has been designed for use in conjunction with other metrics to help identify and evaluate public policy research organizations around the world. An organization's inclusion within the Index does not indicate a seal of approval or endorsement for the institution, its publications, or its programs by the TTCSP. Conversely, an organization's exclusion from the rankings does not necessarily indicate poor quality, effectiveness, or performance. There are 8,162 think tanks around the world completing exceptional work to help bridge the gap between knowledge and policy. This report is no more than one effort to highlight some of the world's leading think tanks.

Methodology and Timeline

Before beginning the 2018 nomination and selection process, the team conducted extensive research in order to update and verify the Think Tank and Civil Societies Program's (TTCSP) Global Think Tank Database. Through this process many additional think tanks were identified for possible inclusion in this year's study. A month in advance of the 2018 nomination and selection process launch, a letter announcing the commencement of the 2018 Global Go To Think Tank Index (GGTTI) was sent to the individuals and organizations in our database. Think tanks were asked to make recommendations for improving the nomination and selection process, in addition to potential Expert Panel nominees. A letter requesting evaluations of the efficacy and validity of the 2017 Rankings criteria, and nomination and selection process, was also sent to expert panelists from previous years.

Timeline of the Nomination and Ranking Process

Call for Expert Panel Members and Update of TTCSP Think Tank Database:

March 30, 2018-April 30, 2018

In preparation for the 2018 Global Go To Think Tank Indexing process, a call for nominations was issued for qualified individuals to serve on the Regional, Functional, and Special Areas of Distinction Panels. In addition, we asked for comments, suggestions and recommendations for how we might improve the Index. In addition, 60 Summer Research Interns help update the TTCSP Think Tank Database to make sure all known think tanks are included in the Survey.

Round I: Nominations –May 18, 2018-July 30, 2018

A call for Nominations was sent to over 8,100 think tanks and approximately 12,800 journalists, public and private donors, and policy makers from around the world. These nominations were tabulated and institutes with 10 or more nominations were included in the next step of the 2018 Think Tank Indexing process. All of the top ranked think tanks from 2017 were automatically included in the 2018 ranking ballot.

Round II: Peer/Expert Rankings – November 30, 2018-January 11, 2019

Think tanks with 10 or more nominations were placed in an electronic ranking survey. A letter announcing the second round was emailed to all the think tanks, journalists, public and private donors, and policy maker groups who agreed to participate in the process. The rankings were tabulated and the list of finalists was generated for the Expert Panel to review and make final selections. Regional and Functional Expert Panels were used for every category. These specialists were consulted to help assure the quality and accuracy of the nominations before they were placed on the final rankings survey.

Round III: Expert Panel Selects 2018 Go To Think Tanks – December 10, 2018-January 10, 2019

The members of the Expert Panel received information packets by email in order to facilitate the final selection process. Individuals who served on last year's Expert Panel as well as those who were nominated this year were invited to serve on the 2018 Expert Panel. Experts from every region and functional area were represented on the Expert Panel. Panelists submitted their rankings and recommendations during the month of December 2018.

2018 Global Go To Think Tank Report Launch: The 2018 Global Go-To Think Tank Rankings will be released in New York, Washington D.C. and over 100 cities around the world on January 31, 2019.

2018 Global Go-To Think Tank Index Nomination and Ranking Criteria

The peers and experts who participated in the indexing process were encouraged to employ the following criteria when considering nominations and rankings. The 2018 GGTTI Nomination and Ranking Criteria include, but are not limited to, the following criteria:

- The quality and commitment of the think tank's leadership (chief executive and governing body). This involves effectively managing the mission and programs of the think tank, mobilizing the financial and human resources necessary to fulfill the mission and monitoring the quality, independence and impact of the think tank;
- The quality and reputation of the think tank's staff. Ability to assemble a critical mass of highly skilled, experienced and productive scholars and analysts who are recognized as either emerging or established experts in their respective area of research;
- The quality and reputation of the research and analysis produced. The ability to produce high quality, rigorous, policy-oriented research that is accessible to policy makers, media and the public;
- Ability to recruit and retain elite scholars and analysts;
- Academic performance and reputation. This involves the academic rigor associated with the research conducted. This includes formal accreditation of a think tank's scholars and analysts, the number and type of scholarly publications produced such as: books, journals and conference papers and the number of presentations delivered at scholarly and other professional meeting and the number and type of citations of the think tanks scholars' research in scholarly publications produced by other scholars;
- The quality, number, and reach of its publications;
- The impact of a think-tank's research and programs on policy makers and other policy actors. Policy recommendations considered or actually adopted by policy makers, civil society or policy actors;
- Reputation with policymakers (name recognition associated with specific issues or programs, number of briefings and official appointments, number of policy briefs and white papers produced, legislative testimony delivered);
- A demonstrated commitment to producing independent research and analysis. This involves standards and policies for producing rigorous evidence based research and analysis that are posted and monitored by the organization, research teams and individual researchers. This includes disclosure of conflict of interest (financial, institutional or personal) and a commitment

to nonpartisanship and established professional standards for research in the social sciences;

- Access to key institutions. The ability to reach and connect with key audiences and personnel such as government officials (elected and appointed), civil society, traditional and new media, and academia;
- Ability to convene key policy actors and to develop effective networks and partnerships with other think tanks and policy actors;
- Overall output of the organization (policy proposals, web visits, briefings, publications, interviews, conferences, staff nominated to official posts);
- Utilization of research, policy proposal and other products. The effective transmission and utilization of policy briefs, reports, policy recommendations and other products by policy makers and the policy community, number of current and former staff serving in advisory roles to policy makers, advisory commissions, etc., awards given to scholars for scholarly achievement or public service;
- Usefulness of organization's information in public engagement, advocacy work, preparing legislation or testimony, preparing academic papers or presentations, conducting research or teaching;
- Ability to use electronic, print and the new media to communicate research and reach key audiences;
- Media reputation (number of media appearances, interviews and citations);
- Ability to use the Internet including social media tools, to engage with policy makers, journalists and the public;
- Website and Digital presence. The quality, accessibility, effective maintenance of the organization's web presence, as well as, the quality and level of digital traffic and engagement (quality, accessibility and navigability of web site, number of website visitors, page views, time spent on pages, "likes" or followers);
- Level, diversity and stability of funding. The ability of an organization to mobilize the necessary financial resources to support and sustain the think tank over time (endowment, membership fees, annual donations, government and private contracts, earned income);
- Effective management and allocation of financial and human resources. The ability of a think tank to effectively manage its money and people so that they produce high quality outputs that achieve maximum impact;
- Ability of the organization to effectively fulfill the terms of the gifts, grants and contracts from government(s), individuals, corporations and foundations who have provided the financial

support to the think tank (financial stewardship);

- The organization's ability to produce new knowledge, innovative policy proposals or alternative ideas on policy;
- Ability to bridge the gap between the academic and policymaking communities;
- Ability to bridge the gap between policy makers and the public;
- Ability to include new voices in the policymaking process;
- Ability of organization to be inscribed within issue and policy networks;
- Success in challenging the traditional wisdom of policymakers and in generating innovative policy ideas and programs; and,
- The impact on society. Direct relationship between the organization's efforts in a particular area to a positive change in societal values such as significant changes in the quality of life within respective country (amounts of goods and services available to citizens, state of physical and mental health, quality of environment, quality of political rights, access to institutions).

Think Tank Impact Assessment Tool

Clearly, assessing the impact of think tanks is not an easy endeavor to undertake given the various and conflicting actors, events, and politics involved in the policy making process. Despite the significant challenges in establishing a causal relationship between knowledge and policy, it is necessary for think tanks to understand and effectively respond to the growing chorus of questions being raised by donors, journalists, and the public about the role and influence of think tanks in civil societies and governments around the world.

Think tanks can employ a variety of metrics to assess their impact, including such measures as an increase in research and analysis they produce as well as to account for their contributions to the policymaking environment and civil society. McGann's recent (2008) research has focused on developing a comprehensive assessment tool for evaluating a think tank's impact. The impetus for this research, in part, was the apparent confusion that exists about the differences between outputs and impacts. In various studies and surveys that McGann has conducted over the years, researchers and think tanks responded curiously when asked about impact on public policy and how they measure it. The overwhelming response was to provide a list of research outputs (number of books published, conference held, web hits, media appearances, etc.). Outputs, however, are not the only way to measure impact.

The metric provided below is designed to serve as a catalyst for a discussion on how to effectively measure the impact of think tanks. It is provided here as background for the think

tank ranking process in the hopes that it will help clarify the distinction between outputs and impacts. We ask that you consider the following indicators when contemplating the impact of think tanks:

- **Resource indicators:** Ability to recruit and retain leading scholars and analysts; the level, quality, and stability of financial support; proximity and access to decision-makers and other policy elites; a staff with the ability to conduct rigorous research and produce timely and incisive analysis; institutional currency; quality and reliability of networks; and key contacts in the policy academic communities, and the media.
- **Utilization indicators:** Reputation as a “go-to” organization by media and policy elites in the country; quantity and quality of media appearances and citations, web hits, testimony before legislative and executive bodies; briefings, official appointments, consultation by officials or departments/agencies; books sold; reports distributed; references made to research and analysis in scholarly and popular publications and attendees at conferences and seminars organized.
- **Output indicators:** Number and quality of: policy proposals and ideas generated; publications produced (books, journal articles, policy briefs, etc.); news interviews conducted; briefings, conferences, and seminars organized; and staff who are nominated to advisory and government posts.
- **Impact indicators:** Recommendations considered or adopted by policy makers and civil society organizations; issue network centrality; advisory role to political parties, candidates, transition teams; awards granted; publication in or citation of publications in academic journals, public testimony and the media that influences the policy debate and decision-making; listserv and website dominance; and success in challenging the conventional wisdom and standard operating procedures of bureaucrats and elected officials in the country.

Beyond this qualitative assessment, an effective evaluation of impact should also involve NGOs, as well as members of the government and policy makers, to ascertain the degree to which they have utilized the grantee’s research output. This participation can be obtained through interviews, surveys, questionnaires, and focus group meetings, utilizing the Outcome Mapping which “moves away from assessing the products of an activity or a program to focus on changes in behaviors and relationships (outcomes) which can lead to changes.” Impact can be viewed as positive if it “changes the behavior, relationships, activities, or actions of the people, groups, and organizations with whom a program works directly.”

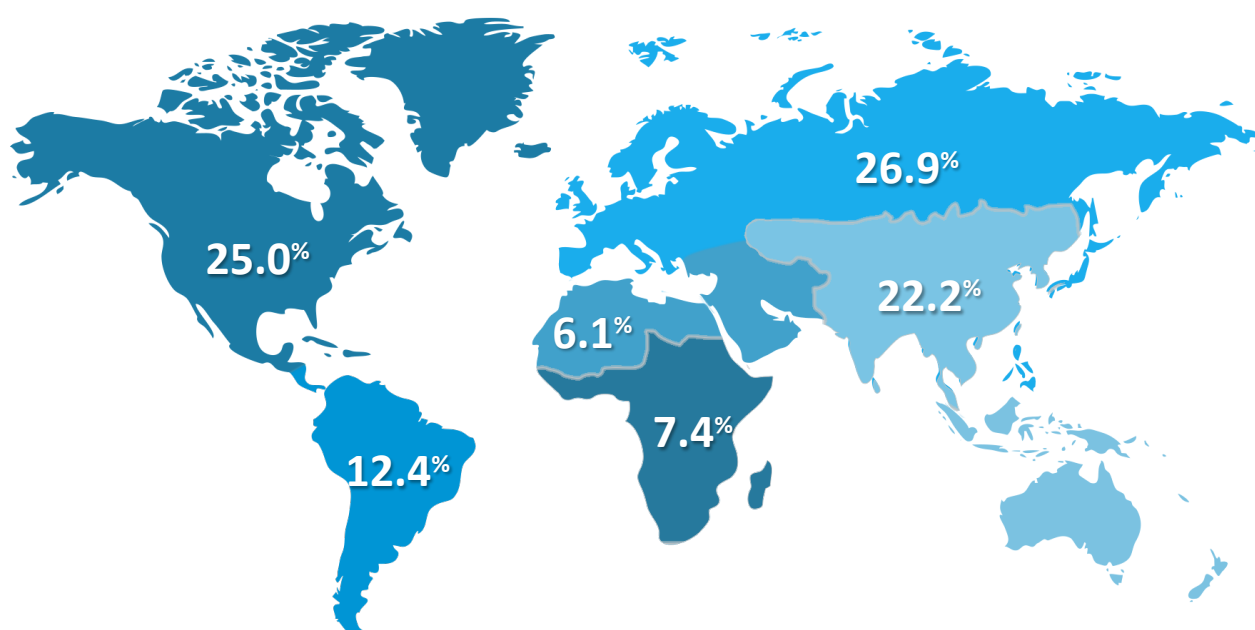

Although this qualitative assessment is essential because it recognizes that policy impact can be successfully achieved even if policy prescriptions are not directly translated into actual policy, we recommend that this assessment should be translated into numerical rankings, thereby allowing comparisons with baseline data for effective monitoring and evaluation in the future.

2018 Think Tank Statistics

Global Distribution of Think Tanks by Region and Number of Think Tanks in the World 2018

This chart reflects the number of think tanks in 2018 based on data collected as of December 2018.

REGION	NUMBER OF THINK TANKS

- Top International Economic Policy Think Tanks
- Top Science and Technology Think Tanks
- Top Social Policy Think Tanks
- Top Transparency and Good Governance Think Tanks
- Top Food and Water Security Think Tanks

Top Think Tanks by Special Achievement

- Best Advocacy Campaign
- Best For-Profit Think Tanks
- Best Government Affiliated Think Tanks
- Best Institutional Collaboration Involving Two or More Think Tanks
- Best Managed Think Tank
- Best New Idea or Paradigm Developed by a Think Tank
- Best New Think Tanks (Unranked)
- Best Independent Think Tank
- Best Policy Study/Report Produced by a Think Tank

- Best Think Tank Conference
- Best Think Tank Network
- Best Think Tanks with Political Party Affiliation
- Best Transdisciplinary Research Program at a Think Tank
- Best University Affiliated Think Tanks
- Best Use of Social Networks
- Think Tank to Watch
- Think Tanks with the Best External Relations/Public Engagement Programs
- Think Tanks with the Best Use of the Internet
- Think Tanks with the Best Use of the Media (Print or Electronic)
- Think Tanks with the Most Innovative Policy Ideas/Proposals
- Think Tanks with the Most Significant Impact on Public Policy
- Think Tanks with Outstanding Policy-Oriented Public Programs
- Top Think Tanks with Annual Operating Budgets of Less Than \$5 Million USD
- Think Tank with the Best Practices (Policies and Procedures) to Assure the Quality, Independence, and Integrity of its Policy Research

2018 Categorical Definitions

By Region

Top Think Tanks in Sub-Saharan Africa: This category is dedicated to the leading institutions in the region south of the Sahara desert. The term is used to contrast the countries that are included in the MENA (Middle East and North Africa) category. Sudan, although geographically located south of the Sahara desert, it is not considered a Sub-Saharan country. These think tanks excel in research, analysis, and public engagement on a wide range of policy issues with the aim of advancing debate, facilitating cooperation between relevant actors, maintaining public support and funding, and improving the overall quality of life in one of the relevant countries.

Top Think Tanks in Central and South America: This category is dedicated to the leading institutions in the Central and South part of the American continent, including the Caribbean states. The definition excludes the three North American countries of Canada, Mexico and the United States. These think tanks excel in research, analysis, and public engagement on a wide range of policy issues with the aim of advancing debate, facilitating cooperation between relevant actors, maintaining public support and funding, and improving the overall quality of life in one of the relevant countries.

Top Think Tanks in the United States: This category is dedicated to the leading institutions in the United States of America. These think tanks excel in research, analysis, and public engagement on a wide range of policy issues with the aim of advancing debate, facilitating cooperation between relevant actors, maintaining public support and funding, and improving the overall quality of life in the United States.

Top Think Tanks in Asia: This category is dedicated to the leading institutions in Central Asia and the Caucasus region, namely Afghanistan, Armenia, Azerbaijan, Georgia, Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, and Uzbekistan. Russia, although possessing territory in Central Asia, is not considered part of the region for this definition. These think tanks excel in research, analysis, and public engagement on a wide range of policy issues with the aim of advancing debate, facilitating cooperation between relevant actors, maintaining public support and funding, and improving the overall quality of life in one of the relevant countries.

Top Think Tanks in China, India, Japan and the Republic of Korea: The Asia category underwent revisions in order to prevent the group's total domination by China, India, Japan, and the Republic of Korea. As such, we divided a single category for "Top Think Tanks in China, India, Japan, and the Republic of Korea".

Top Think Tanks in Southeast Asia and the Pacific: This category includes think tanks in Bangladesh, Bhutan, Brunei, Cambodia, Indonesia, Laos, Macao, Malaysia, Maldives, Mongolia, Nepal, North Korea, Pakistan, Philippines, Singapore, Sri Lanka, Taiwan, Thailand, and Vietnam.

Top Think Tanks in Central and Eastern Europe: Russia presents perhaps the thorniest case of all, since geographically it could conceivably belong to the Central and Eastern Europe, Central Asia, and Asia and the Pacific categories. In order to avoid confusion and to respect the fact that the majority of Russian think tanks lie in the extreme west of the country, Russia will remain in the Central and Eastern Europe category. The Central and Eastern Europe category will include Russian think tanks and also think tanks from those countries that lie between Turkey and Russia in the east and Sweden, Germany, Austria, and Italy in the west. Thus, this category will include think tank in Belarus, Bosnia and Herzegovina, Bulgaria, Croatia, Czech Republic, Estonia, Finland, Hungary, Kosovo, Latvia, Lithuania, Macedonia, Moldova, Montenegro, Poland, Romania, Russia, Serbia, Slovakia, Slovenia, and Ukraine.

Top Think Tanks in Western Europe: This category included think tanks in Andorra, Austria, Belgium, Denmark, France, Germany, Greece, Iceland, Ireland, Italy, Liechtenstein, Luxembourg, Malta, Monaco, Netherlands, Norway, Portugal, San Marino, Spain, Sweden, Switzerland, United Kingdom, and Vatican City.

By Area of Research

Top Transparency and Good Governance Think Tanks: Transparency is a feature that marks the independency of think tanks. There are phantom NGOs and think tanks that actually serve the interest of government or specific individuals and corporations that establish them. A special relationship does exist between funders and thinks tanks that derails the independency and neutral value we believe think tanks should have.

Top Defense and National Security Think Tanks: This category is dedicated to the leading defense and national security institutions of the global community. The top think tanks in this category provide superior innovative research and strategic analyses of national security, military, and defense policies. These institutions not only strive in developing comprehensive policy initiatives for commercial and government clients, but also offer informative publications readily available to the public. These think tanks excel in research, analysis, and public engagement on a wide range of policy issues with the aim of advancing debate, facilitating cooperation between relevant actors, maintaining public support and funding, and improving the overall quality of life in one of the relevant countries.

Top Domestic Economic Policy Think Tanks: This category is dedicated to the leading domestic

economic policy think tanks of the global community. The top think tanks in this category provide superior, innovative research and strategic analyses of domestic economic policy, which covers a wide range of topics such as: the money supply and interest rates, macro and microeconomics, trade and investments, and various other economic areas the government influences. These think tanks excel in research, analysis, and public engagement on a wide range of policy issues with the aim of advancing debate, facilitating cooperation between relevant actors, maintaining public support and funding, and improving the overall quality of life in one of the relevant countries.

Top Education Policy Think Tanks: This category is dedicated to the leading education policy institutions of the global community. The top think tanks in this category provide superior innovative research and strategic analyses regarding educational issues to policy makers and the public. These think tanks excel in research, analysis, and public engagement on a wide range of policy issues with the aim of advancing debate, facilitating cooperation between relevant actors, maintaining public support and funding, and improving the overall quality of life in one of the relevant countries.

Top Energy and Resource Policy Think Tanks: This category is dedicated to the leading energy and resource policy institutions of the global community. The top think tanks in this category provide superior innovative research and strategic analyses on a wide set of issues such as: energy development, production, distribution, and various resource and energy issues significant to the global community. These think tanks excel in research, analysis and, public engagement on a wide range of policy issues with the aim of advancing debate, facilitating cooperation between relevant actors, maintaining public support and funding, and improving the overall quality of life in one of the relevant countries.

Top Environment Think Tanks: This category is dedicated to the leading environmental policy institutions of the global community. The top think tanks in this category provide superior innovative research and strategic analyses on various environmental issues that are of significance on a global level. These think tanks excel in research, analysis, and public engagement on a wide range of policy issues with the aim of advancing debate, facilitating cooperation between relevant actors, maintaining public support and funding, and improving the overall quality of life in one of the relevant countries.

Top Foreign Policy and International Affairs Think Tanks: This category is dedicated to the leading foreign policy and international affairs institutions of the global community. The top think tanks in this category provide superior innovative research and strategic analyses pertaining to world affairs, security, political, and economic policy on a domestic and international level. These think tanks excel in research, analysis, and public engagement on a wide range of policy issues with the aim of advancing debate, facilitating cooperation between relevant actors, maintaining public support and funding, and improving the overall quality of life in one of the relevant countries.

Top Domestic Health Policy Think Tanks: This category is dedicated to the leading domestic

health policy institutions of the global community. The top think tanks in this category provide superior innovative research and strategic analyses on topics related to domestic health services and goals within the specific country. These think tanks excel in research, analysis, and public engagement on a wide range of policy issues with the aim of advancing debate, facilitating cooperation between relevant actors, maintaining public support and funding, and improving the overall quality of life in one of the relevant countries.

Top Global Health Policy Think Tanks: This category is dedicated to the leading global health policy institutions of the global community. The top think tanks in this category provide superior innovative research and strategic analyses on topics related to the health issues and challenges the global community faces. These think tanks excel in research, analysis, and public engagement on a wide range of policy issues with the aim of advancing debate, facilitating cooperation between relevant actors, maintaining public support and funding, and improving the overall quality of life in one of the relevant countries.

Top Water and Food Security Think Tanks: This category is dedicated to the leading global food and water security policy institutions of the global community. The top think tanks in this category explicitly state goals or objective of mitigating the effects of insecurity in both areas with the purpose of promoting greater security. These entities are committed toward combating food security and promoting water security by identifying past and present causes of insecurities in these domains through research and analysis in order to develop targeted and effective solutions with the help of programs and services, outreach, and policy implementation at the local, national or global scale.

Top International Development Think Tanks: This category is dedicated to the leading international development institutions within the global community. The top think tanks in this category provide superior innovative research and strategic analyses on developmental challenges and issues facing the international community, such as: agricultural, growth, poverty, inequality, humanitarian, and various other topics related to development. These think tanks excel in research, analysis, and public engagement on a wide range of policy issues with the aim of advancing debate, facilitating cooperation between relevant actors, maintaining public support and funding, and improving the overall quality of life in one of the relevant countries.

Top International Economic Policy Think Tanks: This category is dedicated to the leading international economic policy institutions within the global community. The top think tanks in this category provide superior innovative research and strategic analyses on topics pertaining international economic policy, such as: globalization, international finance, trade, investment, development, and various other topics relevant to global economics. These think tanks excel in research, analysis, and public engagement on a wide range of policy issues with the aim of advancing debate, facilitating cooperation between relevant actors, maintaining public support and funding, and improving the overall quality of life in one of the relevant countries.

Top Science and Technology Think Tanks: This category is dedicated to the leading science and

technology institutions within the global community. The top think tanks in this category provide superior innovative research and strategic analyses on topics ranging from innovation and telecommunications to energy, climate, and life sciences. These think tanks excel in research, analysis, and public engagement on a wide range of policy issues with the aim of advancing debate, facilitating cooperation between relevant actors, maintaining public support and funding, and improving the overall quality of life in one of the relevant countries.

Top Social Policy Think Tanks: This category is dedicated to the leading social policy institutions of the global community. The top think tanks in this category provide superior innovative research and strategic analyses on topics pertaining to an wide array of social issues and challenges such as: health care, human services, criminal justice, inequality, education, and labor crime and justice, immigration, poverty and various other topics relevant to social policy. These think tanks excel in research, analysis and public engagement on a wide range of policy issues with the aim of advancing debate, facilitating cooperation between relevant actors, maintaining public support and funding, and improving the overall quality of life in one of the relevant countries.

Top Water Security Think Tanks: This category is dedicated to the leading water security think tanks. The top think tanks in this category provide superior innovative research and strategic analyses on topics public policy in the areas of Water security which has been defined as "the reliable availability of an acceptable quantity and quality of water for health, livelihoods and production, coupled with an acceptable level of water- related risks". In addition, it is the capacity to assure access to adequate quantities and quality water to sustain livelihoods, proper health and socio-economic development of people around the world. These think tanks excel in research, analysis and public engagement on a wide range of policy issues with the aim of advancing debate, facilitating cooperation between relevant actors, maintaining public support and funding, and improving the overall quality of life in one of the relevant countries.

Top Food Security Think Tanks: This category is dedicated to the leading food security think tanks. The top think tanks in this category provide superior innovative research and strategic analyses the issue of food security. This includes issues such as the access to sufficient, safe, nutritious food to maintain a healthy and life and the social and economic development communities.

Food security generally focuses on the disruption or unavailability of critical food supplies due to various risk factors such as: droughts, shipping disruptions, fuel shortages, economic instability, and national and sub-national conflicts. These think tanks excel in research, analysis and public engagement on a wide range of policy issues with the aim of advancing debate, facilitating cooperation between relevant actors, maintaining public support and funding, and improving the overall quality of life in one of the relevant countries.

By Special Achievement

Best Advocacy Campaign: Advocacy campaigns are groups of activities or actions that convey the ideas and beliefs of the organizations to the public. That being said, advocacy types of think tanks tend to take strong positions on particular policy issues, which may potentially derail the institute's objectivity and consistent value. As a continuum of structure and functions, advocacy think tanks at times mirror to public lobbies and interest groups.

Best For-Profit Think Tanks: Also known as corporate think tank tanks, for-profit think tanks are research organizations that operate as for profit businesses. In most cases, they are affiliated with a corporation that operates on a for-profit basis. As most think tanks may show structural similarities with organizational siblings, for-profit think tanks are mostly close to government research organizations.

Best Government Affiliated Think Tanks: Government affiliated think tanks are those that situate in the government and are considered a part of the government body. Think tanks honored in this category are recognized for outstanding policy research.

Best Institutional Collaboration Involving Two or More Think Tanks: Institution that is able to network, mobilize, and collaborate with two or more think tanks to produce a modest yet achievable set of global public goods.

Best Managed Think Tank: A well-managed think tank should have institutional-level decisions being widely spread among key staff such as organization head, directors and senior fellows to make sure the information is transparent and shared. Also, upward communication from staff to directors during regular meetings is also important, which ensures mutual understanding and common value are identified within the think tank. Nonetheless, the ability to attract senior analysts in completing organization mission and to provide training plans and workshops that keep the continuum of human capital development are key criteria to reflect organizational control over human resource.

Best New Idea or Paradigm Developed by a Think Tank: The main issue for organizational paradigm is its ability to define the structural design that is appropriate to the fulfillment of functional needs. New idea and paradigm think tanks are ones with solid framework, ways of thinking and methodologies that are specifically developed to meet institutions goals and concerns.

Best New Think Tanks: These are think tanks that have been established in the last 24 months and are centers of excellence.

Best Policy Study/Report Produced by a Think Tank 2017-2018: Quality study/ reports that are able to meet the need of rigorous, policy-oriented research and are accessible to policy makers, media and the public.

Best Think Tank Conference: A quality conference should be able to bring all together the academics, practitioners, and policy makers to evaluate and examine global challenges such as financial risks, sustainability, or inequality in the future as a whole.

Best Think Tank Network: Working through network is a critical factor for a think tank to reach their goals. The ability to expand, mobilize and nurture network efficiently in an environment where organizations are closely entwined with each other helps to generate momentum for think tanks. Though some think tanks may need more secrecy within networks while others don't based on their goal and focus, networking has made the total greater than the sum of all individuals in a comprehensive environment.

Best Think Tanks with Political Party Affiliation: Think tanks that are formally affiliated with a political party and ideology. In the US, they are mostly categorized into Democrats, Republicans, and Independents. As aggregate data from 2014 shows, 39% identify as Independents, 32% as Democrats, and 23% as Republicans.

Best Trans-disciplinary Research Program at a Think Tank: Transdisciplinary research is a research method in which wide ranges of scholars work jointly with stakeholders. It aims at overcoming the production and demand of knowledge to contribute to solutions of social problems. In other words, it combines scholars of various disciplines together to form new conceptual, theoretical, methodological, and translational innovations that move beyond discipline-specific approaches to address a common problem.

Think Tank to Watch: Think tanks in this category are honored for their excellent research and innovative advances within the past 24 months.

Think Tanks with the Most Significant Impact on Public Policy: Public Policy is the means by which a government maintains order or addresses the needs of its citizens through actions defined by its constitution. Public policy is a term used to describe a collection of laws, mandates, or regulations established through a political process. Think tanks honored in this category produce research that is impactful and evident in Public Policy.

Top Think Tanks with Annual Operating Budget of Less Than \$5 Million USD: Think tanks in this category are honored for outstanding research practices and significant research output while operating on a budgets of less than \$5 Million USD.

Best Think Tank with the Best Practices (Policies and Procedures) to assure the Quality, Independence and Integrity of its Policy Research: Think tanks honored in this category adhere and uphold moral and ethical righteousness in their research practices.

Best Regional Studies Policy Research Think Tank (University Affiliated): A university-affiliated think tank is a research center dedicated to public policy analysis with the support of a major university, though the degree of this support fluctuates. These think tanks are often part of a specialized school of a university. Alumni networks often function as sources for key contacts in the policymaking community. The degree of affiliation between think tanks and their respective universities can be measured by analyzing the overlap of certain factors. Most are comprised of professors, researchers, and fellows hailing from their respective universities, but may also include visiting scholars and visiting fellows. They involve student research through research fellowships and internships as well as undergraduate and graduate programs. While some of these think tanks rely on facilities and staff of their respective universities to conduct research, the majority of them determine the research to be conducted independently. Most of these think tanks raise funds specific to their research through grants from individuals, foundations, organizations, and governments, while they may also receive financial support from their respective university. Buildings housing these think tanks tend to be located on their respective universities' campuses. They also have access to other university facilities, such as libraries and research labs, and many of the organizations also have facilities in additional locations.

Best Regional Studies Policy Research Center (Free-Standing, Not University Affiliated): Think Tanks honored in this category are independent of government or university affiliation, and are self-governing institutions. These institutions are autonomous and produce quality research that is objective and unbiased.

2018 GLOBAL GO TO RANKING RESULTS

In advance of presenting this year's results, I would like to stress that the inclusion of an institution in the universe of leading think tanks does not indicate a seal of approval or endorsement of the institution, its publications, or its programs on the part of the Think Tanks and Civil Societies Program.

Likewise, a failure to be nominated does not necessarily indicate a lack of quality and effectiveness or poor performance. There are 8,248 think tanks that are doing exceptional work to help bridge the gap between knowledge and policy. This report is no more than an effort to highlight some of the leading think tanks worldwide.

With that, it gives me great satisfaction and pleasure to present the results of the 2018 rankings process below.

THINK TANK OF THE YEAR – TOP THINK TANK IN THE WORLD

List of Water Security Think Tanks (Alphabetical Listing; Not Ranked)

Table 28

Australian Rivers Institute, Griffith University	Australia
Center for Water Economics, Environment and Policy, Crawford School, Australian National University	Australia
Centre for Water Policy and Management, LaTrobe University	Australia
Commonwealth Scientific and Industrial Research Organisation (CSIRO)	Australia
Cooperative Research Center for Water Sensitive Cities (CRCWSC)	Australia
Global Water Institute, University of New South Wales	Australia
International Water Centre, Brisbane	Australia
Water Research Centre, University of New South Wales	Australia
Sustainable Water	Bolivia
Water Center	Bolivia
World Water Council	Brazil
Program on Water Governance, University of British Columbia	Canada
Water Institute, University of Waterloo	Canada
Asian International Rivers Centre, Yunnan University	China
China Institute of Water Resources and Hydropower Research (IWHR)	China
Research Institute for Water Security (RIWS), Wuhan University	China
Latin America Conservation Council	Colombia
Ashoka Trust for Research in Ecology and the Environment (ATREE)	India
Centre for Science and Environment (CSE)	India
Indian Institute of Water Management, Indian Council for Agricultural Research	India
The Energy and Resources Institute (TERI)	India
Water, Sanitation and Hygiene Institute (WASH Institute)	India
Natural Resources and Environment Center, University of Malawi	Malawi
Institute of Sahel	Mali
Food, Agriculture and Natural Resources Policy Analysis Network	Mauritius
Mexican Institute of the Technology of Water	Mexico

Third World Centre for Water Management	Mexico
Desert Research Foundation of Namibia	Namibia
Deltares	Netherlands
Rijkswaterstaat	Netherlands
Institute for Water Education (IHE)	Netherlands
Watercycle Research Institute (KWR)	Netherlands
Nigerian Environmental Study/Action Team	Nigeria
Centre for Water Law, Policy and Science, University of Dundee	Scotland
Environment and Development in the Third World	Senegal
Somali Centre for Water and Environment, Mogadishu University	Somalia
African Water Issues Research Unit, University of Pretoria	South Africa
African Water Issues Research Unit (AWIRU)	South Africa
Water Institute, University of Pretoria	South Africa
Water Research Commission	South Africa
Africa Water Issues Research Unit	South Africa
African Centre for Water Research	South Africa
Centre for Ecological Research and Forestry Applications (CREAF)	Spain
International Water Management Institute	Sri Lanka
Stockholm International Water Institute (SIWI)	Sweden
Fondation Prince Albert II de Monaco (FPA2)	Switzerland
Geneva Water Hub	Switzerland
East Africa Living Lakes Network	Uganda
Cabot Institute, University of Bristol, houses Bristol's Water Initiative	United Kingdom
Cranfield Water Science Institute	United Kingdom
Environmental Change Institute, Oxford	United Kingdom
Institute of Water (Water Aid)	United Kingdom
Overseas Development Institute (ODI)	United Kingdom
Water Research Centre	United Kingdom
Center for Global Safe Water, Sanitation, and Hygiene (CGSW), Emory University's Rollins School of Public Health	USA

Center for Water-Energy Efficiency, UC Davis	USA
Circle of Blue	USA
Colorado State University Water Center, Colorado State University	USA
Colorado Water and Energy Research Center (CWERC), University of Colorado-Boulder	USA
Institute for Environmental Policy Solutions, Nicholas Institute, Duke University	USA
John Hopkins Water Institute	USA
National Water Research Institute	USA
Program in Water Conflict Management and Transformation, Oregon State University	USA
Pacific Institute	USA
Stroud Water Research Center	USA
Texas Water Resources Institute	USA
The Global Water Institute	USA
Tufts Institute of the Environment	USA
Water Institute, University of Florida at Gainesville	USA
Water Resources Research Center, UMass-Amherst	USA
US Corps of Engineers	USA
Water for Food Institute, University of Nebraska	USA
Water Research Center, Dallas, PA	USA
Water Resources Research Center, University of Arizona	USA
Water Resources Research Institute	USA
West Virginia Water Research Institute	USA
World Resources Institute	USA

APPENDIX A: Email Inviting Peers and Expert Panelists to Rank 2018 Nominated Institutions

October 20, 2018
November 13, 2018
November 24, 2018
November 28, 2018
November 29, 2018
December 8, 2018

Dear Colleague:

I am writing to invite you to help rank the think tanks for the 2018 Global Go To Think Tank Index of the world's leading think tanks. THE RANKING ROUND WILL RUN FROM OCTOBER 20, 2018-NOVEMBER 30, 2018. Click the blue button below to start the survey.

We are still accepting nominations of individuals for the Expert Panels so please send the names, titles and email of individuals that you would like to invite to join the 2018 Global Go To Think Tank Index Expert Panel.

We encourage you to participate 2018 Global Go To Think Tank Index rankings process so the think tanks in your country and regions can be properly reflect in the survey findings. We are requesting that you now rank the think tanks that list in all the categories where you knowledge and experience with the institutions that are listed.

The rankings are broken into three sections: 1. region/location; 2. area of public policy research and 3. special achievement.

The findings of the 2018 rankings will be reviewed by a group Global Panel of Experts who will make the final selections. The International panels of experts will use the collective input of individuals like you to make informed choices for the 2018 ranking of the world's leading think tanks.

After filling out your name, title, institutional affiliation, country and e-mail address, etc. please use the drop-down menu to make your selection(s) for think tank rankings.

Please review the lists of think tanks in the drop down menus under every question to rank the listed of nominated institutions. You can reenter the survey as many times as you like to compete or revise your rankings.

Think Tanks are listed in alphabetical order (A-Z). You must scroll down the list to make your

selection. You can only make one selection at a time and it should be in rank order.

Please make sure you save the link to the survey that we sent you if you plan to re-enter the survey.

YOU CAN NOT FORWARD THE LINK IT IS UNIQUE TO YOUR EMAIL ADDRESS.

Please note: when completing the survey, do NOT use the "back" button on your internet browser, this will erase your answers. Instead, use the "prev" button on the bottom of the survey page.

PLEASE RESIST THE TEMPTATION TO RANK YOUR OWN ORGANIZATION -THAT IS STRICTLY FORBIDDEN AND CLOSELY MONITORED.

Finally, please bring any glowing omissions or gross anomalies or irregularities to our attention immediately so we can share them with the Expert Panel members. There is a form at the end of each category so you can submit your additions, comments and suggestions.

WE HAVE ALSO ADDED A QUESTION AT THE END OF THE SURVEY WHERE YOU CAN SUBMIT YOUR COMMENTS AND SUGGESTIONS.

Thank you for your participation and continued interest in our research on think tanks and civil societies around the world

Sincerely,

James G. McGann, PhD

APPENDIX B: Email Inviting Peers and Expert Panelists to Host “Why Think Tanks and Facts Matter” Events

October 30, 2017

November 25, 2017 Follow Up Ltr

Dear Friends and Colleagues:

I am writing you to invite you to join 100s of think tanks and other civil society actors in global cities around the world in January 2018 for a unique global program. The program will involve a series of coordinated events that are intended to highlight the important role think tanks play in governments and civil societies around the world. A copy of some sample programs from the last couple of years is attached.

The annual Why Think Tanks Matter Forum and the 2017 Global Go To Think Tank Report Launch are scheduled for January 31, 2018 and will take place over 2 days in Paris, Beijing, London, Washington DC, New York and approximately 120 other cities around the world.

We are hoping that you will agree to host a launch event in your city.

If you would like to host a Think Tank Issues Forum and/or the 2017 Global Go To Think Tank Index Report Launch on January 30, 2018, please use the link below to register.

Think Tank Issues Forum and 2017 Global Go To Think Tank Index Launch Registration Sheet:
<https://goo.gl/forms/9nlfvZledwvd46k03>

Over 80 think tanks have already have agreed to host events in their countries and cities. Our goal is to have 120 events around the world.

The theme for this year’s launch is **“Why Think Tanks Matter to Policy Makers and the Public.”** While recent think tank growth has been nothing short of explosive, the relationship between these organizations and the policy making process is not completely understood. The Think Tank Launch Events on January 30th is intended to provide concrete examples of the research and educational programs produced by these institutions and how it serves policymakers and the public.

Our hope is that each local host will organize a Program within the thematic framework of **WHY THINK TANKS MATTER**. The goal is to highlight the critical work think tanks perform in countries around the world. You are encouraged to engage other think tanks and IGOs, media, policymakers and other policy actors in your country as you develop your Event.

Your event should explain what think tanks are, what they do, what value they add and why think tanks are more important than ever before. In the competitive marketplace of ideas and policy advice it is essential that we make the case and provide tangible examples of the important role think tanks in countries around the world. The objective of the Why Think Tanks Matter Events is to have think tanks around the world provide compelling examples the critical

work think tanks perform in a range of political and economic contexts. We also hope that by joining together on January 30, 2016 we can make a strong case for Why Think Tanks Matter.

Please send us your draft program once you have prepared it.

Please confirm your willingness to host an event by **November 30, 2017**.

You must use this registration link in order to host an event: <https://goo.gl/forms/9nlfvZledwvd46k03>

Additional information will be provided in the coming weeks. I wanted thank you once again for join us for this important global event.

All the best, Jim McGann

Background on the Think Tanks and Civil Societies Program

Think Tanks And Civil Societies Program

The Think Tanks and Civil Societies Program (TTCSP) of the Lauder Institute at the University of Pennsylvania conducts research on the role policy institutes play in governments and civil societies around the world. Often referred to as the “think tanks’ think tank,” TTCSP examines the evolving role and character of public policy research organizations. Over the last 26 years, the TTCSP has developed and led a series of global initiatives that have helped bridge the gap between knowledge and policy in critical policy areas such as international peace and security, globalization and governance, international economics, environmental issues, information and society, poverty alleviation, and healthcare and global health. These international collaborative efforts are designed to establish regional and international networks of policy institutes and communities that improve policy making while strengthening democratic institutions and civil societies around the world.

The TTCSP works with leading scholars and practitioners from think tanks and universities in a variety of collaborative efforts and programs, and produces the annual Global Go To Think Tank Index that ranks the world’s leading think tanks in a variety of categories. This is achieved with the help of a panel of over 1,900 peer institutions and experts from the print and electronic media, academia, public and private donor institutions, and governments around the world. We have strong relationships with leading think tanks around the world, and our annual Think Tank Index is used by academics, journalists, donors and the public to locate and connect with the leading centers of public policy research around the world. Our goal is to increase the profile and performance of think tanks and raise the public awareness of the important role think tanks play in governments and civil societies around the globe.

Since its inception in 1989, the TTCSP has focused on collecting data and conducting research on think tank trends and the role think tanks play as civil society actors in the policy-making process. In 2007, the TTCSP developed and launched the global index of think tanks, which is designed to identify and recognize centers of excellence in all the major areas of public policy research and in every region of the world. To date TTCSP has provided technical assistance and capacity building programs in 81 countries. We are now working to create regional and global networks of think tanks in an effort to facilitate collaboration and the production of a modest yet achievable set of global public goods. Our goal is to create lasting institutional and state-level partnerships by engaging and mobilizing think tanks that have demonstrated their ability to produce high quality policy research and shape popular and elite opinion and actions for public good.

The Lauder Institute of Management and International Studies

The Lauder Institute of Management and International Studies offers an M.A. in international studies, and conducts fundamental and policy-oriented research on current economic, political, and business issues. It organizes an annual conference that brings academics, practitioners, and policy makers together to examine global challenges such as financial risks, sustainability, inequality, and the future of the state.

University of Pennsylvania

The University of Pennsylvania (Penn) is an Ivy League school with highly selective admissions and a history of innovation in interdisciplinary education and scholarship. Its peer institutions are Harvard, Stanford, Columbia, Brown, Dartmouth, and the University of Chicago in the US and Oxford and Cambridge in the UK. A world-class research institution, Penn boasts a picturesque campus in the middle of Philadelphia, a dynamic city that is conveniently located between Washington, D.C. and New York, New York.

Penn was founded by Benjamin Franklin in 1740 to push the frontiers of knowledge and benefit society by integrating study in the liberal arts and sciences with opportunities for research and practical, pre-professional training at both the undergraduate and graduate levels. Penn is committed to meeting the full demonstrated need of all undergraduates with grant-based financial aid, making this intellectually compelling integration of liberal and professional education accessible to talented students of all backgrounds and empowering them to make an impact on the world.

The Research Team

Program Director

James G. McGann, Ph.D., is a senior lecturer at the Lauder Institute of the Wharton School and the School of Arts and Sciences at the University of Pennsylvania. He is also the director of the Think Tanks and Civil Societies Program (TTCSP) at the University of Pennsylvania. He conducts research on the trends and challenges facing think tanks and policy makers around the world and provides advice and technical assistance to think tanks, governments and public and private donors on how to improve the quality and impact of policy research. He is also a senior fellow at the Foreign Policy Research Institute, a think tank based in Philadelphia.

Prior to coming to the University of Pennsylvania, Dr. McGann was an assistant professor of Political Science at Villanova University where he taught international relations, international organizations and international law. His current research interest include: assessing global trends in security and international affairs research; the role of think tanks in shaping US domestic and foreign policy; think tanks and policy advice in the BRICS and G20 countries and transnational threats and global public policy. He is the creator and author of the annual Global Go To Think Tank Index which ranks think tanks in every region of the world and major areas of public policy research.

Dr. McGann has served as a consultant and advisor to the World Bank; the United Nations; the United States Agency for International Development; the Soros, Rockefeller, MacArthur, Hewlett, and Gates foundations; the Carnegie Corporation; and foreign governments on the role of nongovernmental, public policy, and public engagement organizations in the US and developing and transitional countries. He has served as the Senior Vice President for the Executive Council on Foreign Diplomats, the public policy program officer for the Pew Charitable Trusts, the assistant director of the Institute of Politics, John F. Kennedy School of Government at Harvard University. He also served as a senior advisor to the Citizens' Network for Foreign Affairs and the Society for International Development.

TTCSP Research Internship Program

The Think Tanks and Civil Societies Program (TTCSP) runs a highly selective internship program for students (grad and undergrad, domestic and international) who are interested in gaining firsthand experience in public policy research in domestic and international affairs.

Over 125 students from across the University of Pennsylvania and from area colleges and universities participated in the TTCSP Research Internship Program during the 2017-2018 academic year. Over 30 interns from the Program have been successfully placed in internships in the US and abroad in locations such as France, Argentina, Jordan, Brazil, England and Spain.

2018 Global Go To Think Tank Index

The Global Go To Think Tank Index (GGTTTI) has become the gold standard of excellence for think tanks around the world and is widely cited by donors, journals, think tanks, and policy makers. More importantly, it has served to raise the profile and performance of think tanks. The 2016 (GGTTTI) marked the 10 year of the publication of the Index report and with each year the ranking's influence has grown. For the past several years, the Global Think Tank Index Report has been launched at the World Bank and United Nations in January. This year, over 300 think tanks, intergovernmental organizations and civil society organizations simultaneously will launch the Index in global cities around the world. Over 3190 academics, policy makers, journalists, and think tank scholars and executives completed the annual indexing process. The 2018 Global Go To Think Tank Index will be released on January 31, 2018.

Think Tank Regional and Global Summits

Since June 2012, the Think Tanks and Civil Societies Program (TTCSP) in cooperation with its regional partners has co-sponsored and organized 45 regional and global think tank Summits. The purpose of these Summits is to engage think tanks in peer-to-peer dialogue, knowledge exchange, and capacity building to help improve the image, profile and performance of think tanks in every region of the world. In addition, we plan to demonstrate the efficacy of creating a global network that engages the leading think tanks in a peer-to-peer exchange of innovative policies and best practices for research and public engagement on key domestic and international issues. The value of these Summits has been clearly demonstrated by the fact that all of the Summit partners and participants have agreed to partner with TTCSP to organize Summits on an annual basis. A number of institutional partnerships between leading think tanks have been formed as a direct result of these Summits. Each Summit is expected to have an impact on the think tanks in each region with a set of action oriented recommendations. The Summits have helped facilitate regional and global partnerships and programs and the Summit recommendations demonstrate that each meeting is a “catalyst for ideas and action.”

While the regional partners' contributions to the Summits vary, many serve as the hosts for the Summit and mobilize local and regional support for them. Often this involves providing in-country logistical support, the venue and significant in-kind support and a financial contribution.

The role of the TTCSP has been to convene the think tanks and to provide the conceptual framework for the Summits which is done in conjunction with our regional partners and based on the research, global think tank index and surveys conducted by the TTCSP.

All previous summit reports can be found here:

https://repository.upenn.edu/ttcsp_summitreports/

2018 Think Tank Summits and Fora Schedule

January 30, 2018: Global Go To Think Tank Index Report Launch and “Why Think Tanks Matter” events in Washington, DC and New York, NY and 175 cities around the world

March 14-16, 2018: Europe Think Tank Summit, Berlin Germany, TTCSP Partner and Co-organizer: Konrad Adenauer Foundation (KAS)

April 11-12, 2018: North America Think Tank Summit, Washington, DC TTCSP Partners: Brookings Institution and the Heritage Foundation

April 26-28: European University Institute in Florence, on 27th April 2018 International Board and conference “Exploring the New Frontiers of Democracy with Key Thinkers and Leaders”

May 9-11, 2018: Africa Think Thank Summit, Rabat, Morocco TTCSP Partner: OCP Policy Center

June 15, 2018: Think Tank Scholars and Managers Program, Beijing Penn Wharton Center, Beijing, China

July 19-22 2018: Think Tank Forum Seville, Spain, Partner: El Real Instituto Elcano

August 27-31, 2018: Sasakawa Peace Foundation, Johns Hopkins University SAIS, Lauder Institute, TTCSP University of Pennsylvania

August 27-31, 2018: Asia Development Bank Institute, Book Launch “Think Tanks the New Policy Advisers in Asia” TTCSP University of Pennsylvania and Asia Development Bank Institute, Tokyo, Japan

September 13-14, 2018: Latin America Think Tank Summit, Montevideo, Uruguay; Parnters: CLAEH, Konrad Adenauer Foundation (KAS)

September 15-16, 2018: T20 for G20 Launch and T20 Advisory Board Meeting, Buenos Aires, Argentina

October 4-6, 2018: MENA Think Tank Summit, Tunis, Tunisia TTCSP Partner: Centre for Mediterranean and International Studies (CEMI)

November 7-9, 2018: Global Think Tank Summit, Brussels Belgium, TTCSP Partner: Bruegel

November 18-20, 2018: Asia Think Tank Summit, Bali, Indonesia, TTCSP Partner: Economic Research Institute for ASEAN and East Asia (ERIA)

December 13-14, 2018: India Think Tank Forum, Delhi, India, TTCSP Partner: Observer Research Foundation
