Now What?

Accurate and Complete Data

Contact me: Brittany.Borg@sba.gov
Takeaways

• Well managed administrative data is very important, don’t assume that because it’s used to manage a program that it is accurate or complete.

• While it doesn’t seem like it should be a program evaluation unit’s job – it can be worth reaching out and supporting data collection and management for programs.

• See if you can cross reference your data with other data (internally or externally).
