Administrative Record (AR) Usage at the Census Bureau

• The Census Bureau's *mission* is to measure the nation's people and economy

• Title 13 of provides authorities for collecting, accessing, and protecting information about the nation’s population and economy

• Charged with strategic re-use of administrative data from federal, state, and third party providers
  • Research: record linkage, developing new statistics, and survey improvement
  • Increasingly, a focus on blended data products
AR Utilization Across the Survey Life Cycle

**Pre Data Collection**
- Fitness for Use
- Frame
- Contact

**Data Collection**
- Routing
- Optimization
- Best Time of Contact
- Vacant / Occupied Units
- Household Roster

**Data Processing**
- Edit
- Impute
- Replace

**Data Dissemination**
- Reports
- Visualizations

**Research & Evaluation**
- Evaluate
- Model
- Innovate

Using AR to Improve Public Assistance Programs

Interactive Data Visualization

- Linked SNAP, WIC and TANF program data to the American Community Survey
- Creates profile of program participants and eligible non-participants to
  - Improve program outreach
  - Improve service delivery to current participants

Nonemployer Statistics by Demographics

Previously: Collected as Part of Survey of Business Owners

- Survey – sample size 1 million
- High respondent burden
- Low response rate => high imputation rate & costs
- Every five years
- Almost four-year lag

Currently: Blended Data Approach

- Leverage AR & Census data
- Full nonemployer universe
- Eliminates respondent burden
- Reduces imputation & cost
- Annual – higher frequency
- Shorter lag than the SBO
- More detailed geography & industry detail possible
- First release in 2020 for 2017 nonemployers vintage
Intergenerational Mobility
