# Outcomes Associated With Good Hospital Work Environments for Nurses

## **Abstract**

Hospital work environments that promote nurse leadership, encourage nurse participation in hospital governance and decision-making, assure adequate resources and staffing, and foster collaboration between doctors and nurses are consistently associated with better patient, quality, safety, and job outcomes. The work environment offers a powerful target for improvement efforts and warrants the resources and attention of health care administrators.

# OUTCOMES ASSOCIATED WITH GOOD HOSPITAL WORK ENVIRONMENTS FOR NURSES

A Meta-Analysis\*

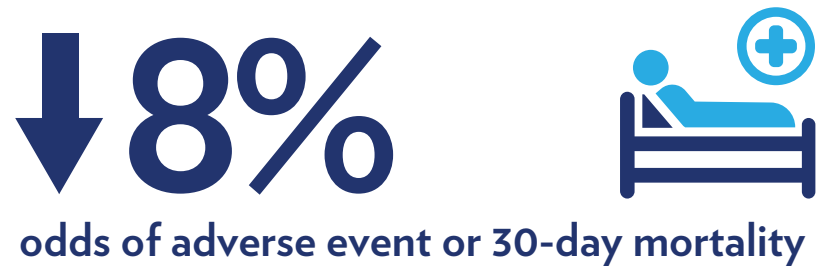

Center for Health Outcomes and Policy Research  
UNIVERSITY of PENNSYLVANIA  
SCHOOL of NURSING

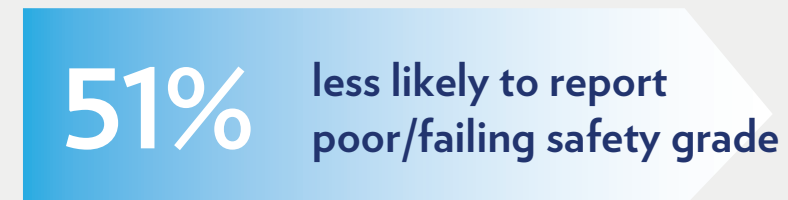

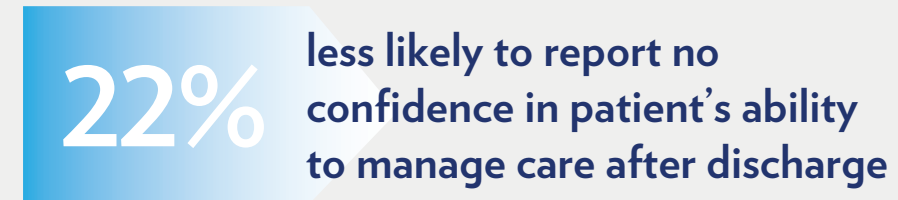

## ResearchSNAPSHOT

### In good nurse work environments...

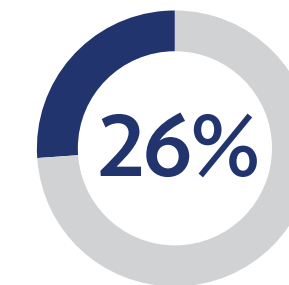

#### PATIENT OUTCOMES

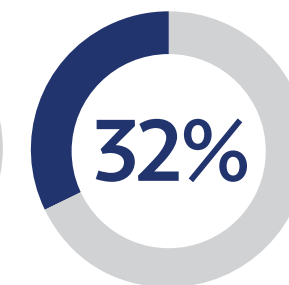

#### NURSE-REPORTED QUALITY AND SAFETY OUTCOMES

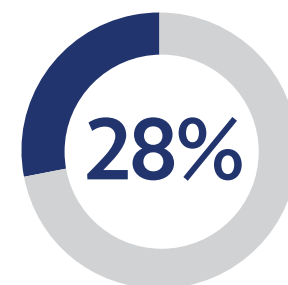

#### NURSE-REPORTED JOB OUTCOMES

less likely to report **burn out**

less likely to report **job dissatisfaction**

less likely to report **intention to leave**

Hospital work environments that promote nurse leadership, encourage nurse participation in hospital governance and decision-making, assure adequate resources and staffing, and foster collaboration between doctors and nurses are consistently associated with better patient, quality, safety, and job outcomes. The work environment offers a powerful target for improvement efforts and warrants the resources and attention of health care administrators.
