## *An Evening in Old Philadelphia* Check Presentation

Members of the Board of Directors of *An Evening in Old Saratoga* and various committee members were on hand to present a check for \$33,000 to **Dr. Alan Kelly** on Sunday, October 5 in the Scott Equine Sports Medicine Building at New Bolton Center. This check represented the proceeds from the group's June fundraiser, *An Evening in Old Philadelphia*, when nearly 300 people attended a black tie gala dinner and silent auction at the legendary home of the Montgomery Scotts, "Ardrossan Farm."

The group toured the Exercise Physiology Laboratory named for them, and saw a presentation by **Dr. Ric Birks** regarding his work in exercise induced pulmonary hemorrhage in the horse.

*An Evening in Old Saratoga* has raised more than \$700,000 in the past dozen years for the School. These funds have helped make possible the purchase of vital diagnostic equipment as well as the completion of the Scott Equine Sports Medicine Building. The School is indebted to the group for their tireless work and enthusiasm and dedicated, loyal support.

## Walter F. Goodman Honored

Walter F. Goodman, a renowned American Kennel Club (AKC) judge and a member of the AKC's Board of Directors, was honored by the School by the renaming of a research center. The Walter Flato Goodman Center for Comparative Medicine and Genetics is dedicated to clinical and basic research on companion animals with diseases that are counterparts of human diseases. The major emphasis is on inherited disorders.

"Throughout his long career as a breeder of superb Skye terriers, and now as a judge of dogs, Walter always put first the health and welfare of dogs," says **Dr. Alan M. Kelly**, the Gilbert S. Kahn Dean of Veterinary Medicine at the School. "Naming the Center in his honor reflects his commitment to and

passion for canine health.

"Walter, for many years, has been an ideal volunteer leader for Penn's School of Veterinary Medicine. In addition to giving generously of his time and talent, Walter has made the financial future of the School a significant personal priority. Recently, he and his associate, Robert A. Flanders, established two irrevocable trusts at Penn."

Researchers at the Walter Flato Goodman Center for Comparative Medicine and Genetics identify and characterize new models of genetic diseases, investigate disease-causing genes, study mechanisms of pathology, and develop novel therapeutic approaches.

Walter F. Goodman joined the School's Board of Overseers in 1986.
