FACE-LIFTING HAN

Our new cover design (layout by David James on the basis of suggestions from G.W.S.) incorporates the figurine chosen as the logo for the XVIth International Congress of the History of Science, in Bucharest, Romania (August 1981). Recovered from the Cemovodă necropolis in Romania dating from 5000-3000 B.C., the exquisitely pensive figure, poised on the aesthetic balance point between the "primitive" and the "modern," evokes a universal attitude of retrospective self-reflection particularly appropriate for a newsletter in the history of anthropology.

FORTHCOMING INTELLECTUAL TOPOGRAPHY

Due to the length of this issue, and the fact that the response to last fall's questionnaire still includes only slightly more than two-thirds of our total active individual subscribers, we are postponing the presentation of the resulting data for one more issue. If there is a red mark in the margin to the left, it means that we have not yet received a completed questionnaire from you. Drop us a note, and we will be glad to send along another copy of the questionnaire.

SOURCES FOR THE HISTORY OF ANTHROPOLOGY

I. ADDITIONAL REDFIELD MATERIALS

The Special Collections Department of the Regenstein Library, University of Chicago, has received further materials relating to the life and career of Robert Redfield, as well as the papers of his wife Margaret Park Redfield. The former include especially documents relating to Redfield's family background, childhood, experiences in World War I, and his anthropological career prior to 1930, as well as numerous photographic materials. In addition to correspondence with her husband and letters relating to the biography of her father (the sociologist Robert Park), Mrs. Redfield's papers include materials produced in the course of her own anthropological research. Brief descriptive catalogues have been prepared.

II. MARGARET MEAD PAPERS

Margaret Rossiter reports having been informed by the Library of Congress that the bulk of the papers of Margaret Mead were received by the Library in three installments during 1980. Ac. 17,788 (Ca. 350,000 items) includes correspondence, memoranda, financial papers, writings, reports, printed matter, notes and notebooks, minutes of meetings, itineraries, and other papers, dating from 1924 to 1979. Ac. 18,046 (Ca. 275,000 items) includes correspondence, subject files, writings, motion picture film, audio tapes, photographs, notes, printed material, and other papers comprising additional papers of Margaret Mead; field material; papers of colleagues including Rhoda Metraux and Gregory Bateson; and project files. Ac. 18,060 (Ca. 300 items) includes chiefly family papers and correspondence, school notebooks, scrapbooks, clippings, printed matter, and other
