Early Support = Continued Support

Young Alumni will be hearing about the new **5 for 25** campaign over the next few months.

Pacesetters, young alumni who have graduated within the last five years, will be asked to contribute five dollars for each year since graduation. All monies raised from this campaign will be placed into an interest-bearing endowment fund and used as the foundation for each

class' 25th reunion gift.

Dr. Norbert McManus, V'47, long standing class agent and originator of the idea for the **5 for 25** campaign, feels so strongly about it that he has agreed to provide \$100 in seed money for each Pacesetter class. Dr. McManus believes that early Alumni Annual Giving is an indicator and important factor of continued support.

Scholarships

Joshua H. Clay, V'95, received a scholarship from the Clark Foundation. **Lisa Van der Gaag, V'94**, received the Clifford F. Wright, Jr. Scholarship. Five Dr. J.E. Class of 1997

The Class of 1997 arrived on campus on August 25 for three days of orientation. This is a diverse class of 96 women and 34 men. The youngest is 20 and the oldest is 47, about ten students are in the 35-42 age group. The largest number of the students is from Pennsylvania, followed by students from New Jersey, New York, California, Maryland, Delaware, Connecticut and Massachusetts. The other states represented with one student each are Rhode Island, Maine, Colorado, Georgia, Hawaii, Ohio, and Virginia. There are some students of foreign origin, two Israelis, one Finn, one from India, one Canadian, and one from Great Britain.

There are 53 biology majors and 27 animal science/bioscience/zoology/pre-veterinary majors. These are followed by the chemistry (6) and biochemistry (2) majors. The other majors run the gamut from English/French/Italian to applied mathematics, East Asian studies and economics.

There are two lawyers in the class and a nurse/midwife. Other graduate areas of specialization include aerospace engineering, systems engineering, home economics/nutrition, pharmacology, biochemistry, microbiology, marine studies, physiology, environmental science and laboratory animal science.
