

Regents, assorted correspondence with various professional societies and journals as well as with funding sources (especially the Josiah Macy, Jr. Foundation, NIH, and NOTS), and many letters arranging the details of essays, lectures, conferences, classes, etc. There is also an extensive correspondence relating to the three Wenner-Gren conferences which Bateson chaired. Topics covered in the correspondence include the entire range of Bateson's wide field of interests.

Research in the Archive is facilitated by a 2,514-page guide/catalog which, in addition to identifying each item in the Archive, contains a detailed biographical chronology, a definitive Bibliography of the Published Work of Gregory Bateson compiled from original sources and superseding all previous Bateson bibliographies, a catalog of the libraries of Gregory Bateson and his geneticist father William Bateson, a complete list of Bateson's published and unpublished writings arranged chronologically by date of composition (including the Bateson manuscripts represented only in the Library of Congress archive), cross-referencing among the various portions of the Archive to elucidate the contexts of otherwise unidentifiable items, a complete name and word/subject index to the correspondence files (incorporating identification of every potentially obscure reference and allusion in Bateson's letters), and an essay on the history and arrangement of the Archive.

Having completed the Archive, Rodney Donaldson is currently editing a volume of Bateson essays, to be entitled Further Steps to an Ecology of Mind (to be published by Harper & Row), as well as editing a volume of Bateson's most important correspondence. He would therefore be grateful to hear of any information regarding the whereabouts of Bateson correspondence in other archives or private hands. Please send information to Dr. Ronald F. Donaldson, P. O. Box 957, Ben Lomond, CA 95005. Donaldson is also willing to consult with anyone contemplating creating an archive.

II. George Neumann Archive

The papers of George Neumann, an orthopedist cum physical anthropologist of German immigrant background and typological persuasion, who was at the University of Michigan and later at Indiana University before his death in 1971, are now at the Oregon State University in Corvallis. According to Roberta Hall, of the Department of Anthropology, who is now in the process of preparing an index, the materials cover a thirty year period which was an "interesting and crucial time in the development of contemporary approaches to human evolution and variation."

III. Radcliffe-Brown Materials at the University of Sydney

Peter Austin (Linguistics, La Trobe University) notes several bodies of Radcliffe-Brown manuscript materials at the University of Sydney. The Fisher Library has card files kept by
